# From the EDITOR

Amy Yohe, Managing Editor

Dear Educator,

What a privilege it is to have the opportunity to partner with schools in Brasil that share a common mission with Abeka! We are passionate about your ministry through Christian education and would love to serve you in every way possible.

For over 50 years, Abeka has provided Christian school curriculum with every subject based on a biblical worldview. Our resources are also widely known for their academic rigor enhanced by our commitment to phonics-based reading instruction, cross-subject integration, spiral review for maximum connection and retention, development of thinking skills, and so much more!

I know you will find many resources in this catalog that will enhance your passion for teaching, and we welcome your feedback to ensure that we are making it easy for you to teach amazing lessons. We know the lives you influence academically and spiritually this year will make a difference now and for eternity!

## New and Revised Products

### English 10

#### Grammar

Instruction includes twelve units of easy-to-follow rules detailing mechanics, the parts of speech, and sentence structure. Focused exercises, such as diagramming, train students to analyze the function and importance of each word. The addition of the Glossary of Diction teaches appropriate use of expressions in formal writing.

#### Literature

Providing broader exposure to the global canon of literature, this series contains select works from over thirty countries and includes the novel *The Scarlet Pimpernel* and the play *Julius Caesar*. Eight poems within the literature book are suggested for memorization. Brimming with background information, reading strategies, illustrations, and discussion prompts, this literature text fosters critical thinking through a biblical worldview.

#### Composition, Vocabulary, and Spelling

This focused text is designed to advance students' writing and vocabulary abilities. Step-by-step guides and annotated examples of composition projects aid students in writing with structure, clarity, and individuality. Twenty spelling and vocabulary lists help students apply spelling rules and etymology while themed sections incorporate terms from the fields of history, fine arts, science, and business.

### 11th Grade

#### Chemistry

Teach essential chemistry concepts to your students with the revised Chemistry text. Your students will explore topics from chemical reactions to organic chemistry with an emphasis on critical thinking and application. In-depth explanations, examples, and practice throughout will thoroughly prepare students for assessments. Additionally, students will appreciate the notes, tips, critical thinking opportunities, writing prompts, and biblical worldview emphasis throughout the text. Feature boxes highlight real-world application and history of selected topics. The correlated materials include a two-volume Teacher Edition, Digital Teaching Slides, Quizzes/Tests book and Teacher Key, Laboratory Manual and Teacher Edition, and STEM Project Guide.

# How We Develop A CURRICULUM You Can Depend On

*Timely.*

*Thorough.*

*Trustworthy.*

Reliable studies for traditional best practices—validated by the consistent success of millions of students over decades—form the basis of Abeka textbooks, curriculums, and other materials. When you teach with Abeka, your teaching is based on biblical principles that address the nature of the learner and learning itself, the nature of truth and authority, and what is truly important to learn and remember.

## **BIBLICAL WORLDVIEW**

Teaching every subject through the lens of Scripture reinforces that our lives aren't split into the sacred and the secular everyday life. It gives students countless opportunities to come to Christ for salvation and to adopt biblical values of their own.

## **RESEARCH & DEVELOPMENT**

Products meet both biblical standards and academic standards so that your students are prepared for whatever God calls them—from the mission field to the medical field.

## **PROVEN PHILOSOPHY**

Your materials and methods start with the firmest foundation: what the Bible says about human nature, knowledge, authority, orderliness, and philosophy.

## **CRITICAL THINKING**

Building from a foundation of facts, your students will learn how to apply those facts to solve problems, generate ideas, and discern truth.

Our process demonstrates academic integrity, content research, trial testing, and ongoing evaluation to provide the very best in Christian educational materials.

**1**

## ***Needs Assessment***

Creation based on current scholastic requirements and the needs assessment of Christian education.

**2**

## ***Research***

Careful research of educational standards and objectives along with academic trends and standardized testing data evaluated to determine selection and treatment of topics based on their overall fit into the preschool–12 scope and sequence with respect to sequential progression and age appropriateness.

**3**

## ***Writing & Illustrating***

Textbooks, teaching resources, and assessments actually written and edited by master teachers who have successfully taught in the field. Supporting media and illustrations also developed concurrently.

**4**

## ***Ongoing Development***

Editorial and research teams assist writers through ongoing development to corroborate, review, and polish content and technical changes for readability, style, and form.

**5**

## ***Initial Printing***

Layout and design finalized and approved for initial printing and piloting.

**6**

## ***Pilot***

Textbooks and materials are piloted at Pensacola Christian Academy. Continuous feedback from active teaching professionals is provided along the way.

**7**

## ***Revision***

Editorial team makes necessary revisions to ensure maximum readability, academic rigor, assessment validity, and student appeal.

**8**

## ***Publication***

Final editorial approval and release for publication.

# Subject Distinctives

## Bible

### *The foundation for all learning*

The Abeka Bible program presents the Bible in the narrative style in which it is written. Students are led through the stories and truths of the Old and New Testaments, including Bible doctrine and application at an age-appropriate level. **It is our goal to help you reach children of all ages with the Gospel and to equip you as you guide them in developing a biblical worldview.**

## Reading

### *The means by which each person may learn for himself*

Because children often emulate what they read, they benefit from the development of reading skills through character-building reading materials from an early age. Abeka employs phonics as the most logical, orderly way to introduce reading to children. Abeka readers are beautifully illustrated and imaginatively written.

**Selections are carefully chosen for interest, readability, theme, and values, with literary concepts and questions throughout to guide students in comprehension of reading material and in development of critical thinking skills, including life application of valuable principles.**

## History

### *A realistic view of time, government, geography, and economics based on eternal truths*

Abeka's history courses present a thought-provoking portrayal of peoples, lands, ideals, heroes, triumphs, and setbacks in light of the biblical principles that govern the natural course of history. Students benefit from this traditional, conservative approach to the study of what man has done with the time God has given to him.

Along with the story of history, students see the purpose of government as ordained by God to maintain law and order, not as a cure-all for humanity's problems.

The benefits of free-enterprise economics are presented in contrast with the dangers of Communism, socialism, and liberalism. Geography studies are woven in to provide a well-rounded perspective of locations in conjunction with events. **This approach results in edifying history texts that give students a historical perspective and instills within them a gratitude for God's hand in history and a desire to influence the future by fulfilling the Great Commission (Matt. 28:19-20).**

## Mathematics

*The study of logic and order to apply to science and daily life*

Abeka teaches that the laws of mathematics are a creation of God and thus absolute. Man's task is to search out and make use of the laws of the universe, both scientific and mathematical. This is in significant contrast to the modern math theories that are based on mathematics as a creation of man and are thus arbitrary and relative.

Students enjoy Abeka's variety in covering multiple branches of mathematics—arithmetic, geometry, algebra, etc.—each year on an age-appropriate level. At the same time, they benefit from the spiral approach of revisiting and building upon the learning throughout each year and from one year to the next. The learning is both relevant for today and foundational for the future, with each course purposefully preparing students for the next. **This solid foundation of mathematical concepts and problem-solving skills, enhanced with a biblical worldview, intentionally and naturally results in lifelong application.**

## Science/Health

*The investigation of variety, order, and reasonableness revealed in creation*

The Abeka science and health program presents the universe as the direct, orderly, law-abiding creation of God and refutes the man-made idea of evolution. Students are presented with plants, animals, rocks, elements, forces, the human body—and much more—according to an understanding of the design and laws of nature.

Learning is delivered through age-appropriate content in a variety of scientific fields, including life science, chemistry, and physics. This content is supported by full-color illustrations to enhance learning, oral and written activities to reinforce learning, and hands-on demonstrations to personalize learning. **Students are equipped to explore science from a biblical worldview while developing practical use of the scientific method and application of critical thinking skills.**

## English

*The study of language and communication in a structured, reasonable, and well-articulated manner*

Because thought and language form the foundation of learning and communication, teaching grammar, spelling, vocabulary, composition, and literature is vitally important. Abeka presents language in a structure in which students develop orderliness, reasoning, and logic.

Students will benefit from Abeka's commitment to an emphasis on reliable grammatical and literary structure that prepares them for analysis and practice. The desirable result is mastery with the development of critical thinking. Because of this emphasis, students see the importance of correct spelling and the continual expansion of one's vocabulary. **Students are provided with examples of the very best literature of the ages, opportunities for the continual improvement of speaking and writing ability based on a strong grammatical foundation, and the development of individual discernment based on a biblical worldview.**

# K4

## KINDERGARTEN—K4 | Student

**LANGUAGE ARTS****Little Books 1–12****138401**

These delightfully illustrated little books are excellent tools for introducing children to the reading circle. They start with very basic vowel sounds and go on to consonants, blends, words, and simple sentences. Each book is short enough for a child to complete in one or two sessions. The books also include activity pages for review and coloring.

**Animal Friends Books 1–8****138428**

Each full-color book features carefully selected, very simple one- and two-vowel words and stories that are sure to appeal to your beginning readers.

**Mini Alphabet Flashcards 31 Cards (2¾" x 3½")****138533**

Mini cards are just like the large ones teachers use! As the students learn the sounds of the letters, they take the mini cards home.

**ABC Writing Tablet SECOND EDITION****138568** Cursive**167274** Manuscript

Sample letters appear exactly the way they are to be written. This helps children to see the exact formation of the letters in the size they are to trace them. Tracing exercises provide practice in proper formation. The "houses" throughout the tablet aid children in placement of letters. There are enough pages for the entire school year.

**Writing with Phonics K4 SIXTH EDITION****138576** Cursive**167282** Manuscript

This delightful second-semester book gives children extra practice in writing as they review their phonics sounds. The pages are used for seatwork.

**PHONICS/NUMBERS****ABC-123 FIFTH EDITION****138525**

Phonics, counting, and numbers writing activities reinforce what children learn in the classroom. The numbers pages introduce number concepts and the formation of numbers 1–20. Children enjoy counting and coloring the familiar objects for each number and forming the numbers. The phonics-based reading readiness pages are full of carefully sequenced activities in recognition, sound, and formation of vowels (long and short), consonants, consonant-vowel blends, and one-syllable words with one or two vowels.

**DEVELOPMENTAL SKILLS****Readiness Skills K4 SECOND EDITION****138592**

Coloring pages, directed art, and other activities help the young child develop writing readiness, eye-hand coordination, visual perception, and listening and thinking skills.

**ART****Art Projects K4 THIRD EDITION 36 projects****138584**

Helps develop the motor skills needed to draw, color, cut, and glue. Month-by-month projects are correlated with academics, Bible teaching, and the seasons.

**K4 Bible Activity Book SECOND EDITION****138614**

This activity book helps reinforce truths that the children learn from major Bible stories of both the Old and New Testaments. Students will enjoy completing the dot-to-dot pictures, following the simple mazes, and coloring pages with delightful art. Can be completed in Activity Time.

**BIBLE****Bible Memory Picture Cards 26 cards****167134** Miniature (3½" x 4½")

Colorful pictures make learning and review of Bible verses easy as children associate the verse with the picture. Children enjoy taking the miniature cards home and reviewing them with their parents.

*The Curriculum Lesson Plans and teaching aids meant to be used with these books are on p. 56.*

**LOOK INSIDE**

Teaching your students to read shouldn't be a struggle.

Enjoy introducing your four-year-olds to reading using the simple steps of Phonics. Beginning with learning sounds of vowels, then consonants, students quickly learn to join the sounds together to form words. Sounding one-vowel words will delight your students as they are able to read simple stories on their own!

### SCIENCE Investigating God's World FOURTH EDITION 135151

*Investigating God's World* leads students continually from the known to the unknown by teaching important science concepts within the context of things they can see and know. The aim is to help them really understand basic principles of science. The text presents the world as the creation of God and glorifies Him as its Sustainer and Upholder. It introduces great scientists and naturalists who believed in the biblical account of Creation, and where appropriate it refutes the materialist's faith in evolution. Students learn about plants, animals, matter, energy, light, minerals, and other topics. Review questions and a multitude of activities and demonstrations make this a thoroughly teachable text.

## MATHEMATICS | Student

Teach mathematics with confidence using logically arranged texts that emphasize problem solving. Your students will build a solid foundation on simpler concepts that prepare them for the complex concepts they'll learn as they progress through each text. With the Grade 7-12 math series, you will instill in your students a sound, practical knowledge of mathematics that they'll be able to apply throughout their lives.

### *Intermediate Mathematics and Pre-Algebra*

Each text moves step-by-step from basic concepts to the more difficult. Practical word problems throughout the text show students the benefits of learning math. Each lesson is followed by an assignment, which provides

homework to review that day's lesson and material from previous lessons. The material is divided into teachable daily lessons. The bright, open appearance and clear, readable type encourage student interest.

#### FIRST EDITION

#### **Intermediate Mathematics** **294012**

This work-text gives a strong review of all arithmetic concepts and skills in conjunction with instruction in other branches of mathematics including algebra (four units), plane and solid geometry, and probability and statistics, providing the foundation students need to enjoy success in future mathematics courses. Problem-solving strategies throughout the text help students develop needed

problem-solving skills. Practical applications are utilized such as adjusting recipes, finding discounts, and calculating area. "Fast Facts" are short, special features that appear throughout to promote student interest and learning. Charts, step-by-step processes, glossary, and index complete this comprehensive work-text.

## Plane Geometry & Precalculus

These texts provide a foundational introduction to the underlying principles of higher mathematics. Students receive a good working knowledge of the subject and are trained to think naturally, logically, and systematically. These texts are simple in organization and exact in explanation, and place an emphasis on student understanding. Care is taken throughout to ensure that theory leads to understanding and the ability to make application. New concepts are carefully explained and linked to previously learned material. Numerous examples illustrate definitions and principles. Extensive exercises provide ample practice for application and retention of student learning.

SECOND EDITION

### Plane Geometry 95370

This traditional text acquaints students with the fundamental tools of geometry in an interesting way. Students are impressed with the necessity of a formal proof before being plunged into demonstrative geometry. Many proofs are done for students to train them in the thinking process. Students are taught to think naturally, logically, and systematically through a well-written text and abundant exercises. Students enjoy the many "extras," which include the mathematical information on several famous buildings, biographies of great mathematicians, and geometry in the world around us.

FIRST EDITION

### Precalculus with Trigonometry and Analytical Geometry 115797

**314811** Digital Textbook\*

This text provides a strong foundation for work with functions and culminates with an introduction to the calculus topics of the derivative and the integral. Beginning with a review of basic trigonometry, the study progresses to advanced topics including functions, identities, and trigonometric equations. Development of analytical

geometry topics includes a logical approach to the study of lines, conics, quadric surfaces, polar coordinates, and parametric equations. Colorful graphs in one, two, and three dimensions illustrate the concepts and provide a frame of reference for discussion. Helpful tips and example problems show step-by-step solutions that aid in understanding and problem solving. Balanced exercises in each chapter provide ample opportunity for students to understand both the algebraic solution and practical application of problem solving.

SECOND EDITION

### Consumer Mathematics 26603

Unit One, "Buying a Car," captures teenagers' attention immediately and proceeds to units on budgeting; banking; investing; keeping tax records; purchasing food, clothing, a home; and more! The text presents a Scriptural view of working, tithing, saving, paying taxes, and budgeting time and money and gives a positive introduction to the American free-enterprise system. Each information-packed unit contains sample problems for students to

follow and an abundance of practice problems. An analytical skills section in each chapter challenges students to analyze practical problems or opportunities they could soon be facing.

### Business Mathematics 67946

Business Mathematics introduces the Grade 9–12 student to the math needed to operate a business and to successfully manage family finances. The text uses Scripture to train students to have godly attitudes toward finances and work responsibilities. Each section of this text requires students to use skills to solve real-life computing problems. The text abounds in example problems that guide the student toward independent

thinking. The variety of word problems tests their knowledge of concepts and skills and stretches their mathematical ability. Each unit begins with basic skills and concepts and builds gradually to more difficult concepts. Students easily master math concepts and skills through the many problems in each section. Daily review is incorporated into each lesson, while thorough reviews precede each test.

## American Government

*in Christian Perspective*

**89281** (one semester)

**314536** Digital Textbook\*

*American Government* provides for students the firm foundation needed to become informed, responsible citizens and voters in today's world. This text opens with an inspiring look at the blessings we enjoy and the symbols we hold dear as American citizens. This is followed by a detailed study of the Constitution, the government it established, and the rights and

privileges it guarantees the American people. After studying the Constitution and the national government, students learn about federalism and government at the state and local levels. The text concludes with a chapter on the opportunities and responsibilities of American citizens to get involved in their unique political system. It presents an American government as it was intended by its framers. Maintaining law and order while recognizing the freedom of citizens is emphasized as the proper role of government.

Emphasis on free-enterprise capitalism in a free-market economy sets *Economics: Work and Prosperity* apart. Students are informed how to understand the economic roles of individual producers and consumers as well as that of the government. The stark contrast between the market economy—the cornerstone of prosperity in the United States—

and the command economy—the hallmark of fiscal failure in Communist countries—is graphically presented in illustration of the economic principles that govern all societies. *Economics: Work and Prosperity* is not just a text about buying and selling or supply and demand. Rather, the biblical view of work, wealth, and stewardship appears throughout the text, with essential concepts such as competition in the marketplace and private ownership of capital being presented from a conservative perspective.

### ECONOMICS: WORK AND PROSPERITY INCLUDES:

- A variety of visual aids, including charts, photos, and illustrations that are presented in an attractive layout to aid in student learning and enjoyment.

# Equipping your TEACHERS

By using the approach and methods our textbooks were designed to be taught with, you can maximize your students' learning experience. The good news is, everything that follows—the Curriculum Lesson Plans, Teacher Editions, answer keys, teaching aids, classroom resources—was designed with all teachers in mind. Young teachers. Veterans. Even experienced teachers who are new to Christian schools. We've created

a structure for teaching subjects that will give you the words to say when you're uncertain how to introduce a new concept and the freedom to get creative and be successful. After all, it's always been our calling to support yours.

*Find the resources you need in the pages that follow. **Preschool through Grade 6** are grouped by grade. **Grades 7–12** are grouped by subject.*

**AESOP'S FABLES**  
AESOP

**Building Understanding**

**INTRODUCTION**  
In these famous fables, Aesop shares bits of wisdom regarding important aspects of life.

**THEMES**  
Kindness • trust • loyalty

**SIGNIFICANT STRUCTURES**  
A couple of the fables presented here are **beast fables**, fables featuring animals that speak, reason, and behave as humans do. These fables use animal characters to give commentary on human behavior.

**READING STRATEGY**

- Consider what each story is teaching and restate the moral in your own words.
- Identify the different characters in each fable and the specific characters traits they embody.

**The Lion and the Mouse** *theme of kindness*

A Lion was awakened from sleep by a Mouse running over his face. Rising up in anger, he caught him and was about to kill him when the Mouse piteously entreated, saying: "If you would only spare my life, I would be sure to repay your kindness." The Lion laughed and let him go. It happened shortly after this that the Lion was caught by some hunters, who bound him by strong ropes to the ground. The Mouse, recognizing his rap, came up and gnawed the ropes with his teeth and, setting him free, exclaimed: "You ridiculed the idea of my ever being able to help you, not expecting to receive from me any repayment of your favour; but now you know that it is possible for even a Mouse to confer benefits on a Lion."

174 UNIT 5 ♦ FABLES, FOLKTALES, AND LEGENDS

**Tip**  
**The Lion and the Mouse**  
Like the lion, it may be easy to look at the deficiencies of others or of ourselves and wonder how we could make a difference for eternity. However, 1 Cor. 1:27 says, "God hath chosen the weak things of the world to confound the things which are mighty." God can use us as long as we are willing to trust and obey Him.

**Discussion**  
What is the moral of "The Lion and the Mouse"? How could this be applied in your own life, keeping in mind Scriptural truth? Kindness is often repaid in unexpected ways. As Christians, we should never offer kindness expecting something in return, but rather trust that God will reward it someday, knowing that we reap what we sow (Gal. 6:7–9). Whether or not we receive a reward here on earth, we will one day in heaven (1 Cor. 3:10–15). Also, we should not dismiss the potential of others based on appearances. We can value others by getting to know them instead of making superficial assumptions about them.

## The Goatherd and the Wild Goats

A Goatherd, driving his flock from their pasture at eventide, found some wild goats mingled among them and shut them up together with his own for the night. On the morning, it snowed very hard, so that he could not take the herd to their usual feeding-places, but was obliged to keep them in the fold. He gave his own goats just sufficient food to keep them alive but fed the strangers more abundantly in the hope of enticing them to stay with him and of making them his own. When the thaw set in, he led them all out to feed, and the wild goats scampered away as fast as they could to the mountains. The Goatherd taxed them with their ingratitude in leaving him when during the storm, he had taken more care of them than of his own herd. One of them turning about said to him, "That is the very reason why we are so cautious; for if you yesterday treated us better than the Goats you have had so long, it is plain also that if others came after us, you would, in the same manner, prefer them to ourselves."

## The Bear and the Two Travellers

Two men were travelling together, when a Bear suddenly met them on their path. One of them climbed up quickly into a tree and concealed himself in the branches. The other, seeing that he must be attacked, fell flat on the ground, and when the Bear came up and felt him with his snout, and smelt him all over, he held his breath and feigned the appearance of death as much as he could. The Bear soon left him, for it is said he will not touch a dead body. When he was quite gone, the other traveller descended from the tree, and, according to his friend, jocularly inquired what it was the Bear had whispered in his ear. He replied, "He gave me this advice: 'Never travel with a friend who deserts you at the approach of danger.'"

**THOUGHT PROVOKER**  
Did the bear really whisper to the second traveller? Why do you think the first traveller asked what the bear said? Why did the second traveller go along with the first traveller's question?

## Teacher Note

Remind students of the difference between a moral and a theme. Use the diagram below to help students compare and contrast the moral and the theme.

MORAL	THEME
<ul style="list-style-type: none"> <li>Lesson or takeaway—often practical</li> <li>Normally advice or a warning</li> <li>Provides a clear principle for application in the reader's own life</li> <li>Is the author's own commentary on a topic</li> </ul>	<ul style="list-style-type: none"> <li>Main idea of a work—recurring throughout the story</li> <li>Normally a general idea such as love or justice</li> <li>Provides a main idea of the work but not clear instruction for personal application</li> <li>Is an idea that the author may provide commentary on</li> </ul>

Biblical Worldview questions and answers to train students to analyze texts from a biblical perspective

**Biblical Worldview**  
Answers may vary. The Bible encourages us to be wise as serpents and innocent as doves. It is important to use discernment in trusting others because there are those who will flatter with their words while their heart's intent is to cause harm.

**Thought Provoker**  
No. The first traveler asked the question to make light of the situation, and the second traveler answered him to emphasize the fact that the situation was not a laughing matter.

### Rapid Calculation Drills C

90 Drills (4" x 6")

**152137**

Oral drill problems, printed for teachers, are essential to the grades 7–8 mathematics curriculum. Drills will sharpen students' skills in all processes.

### Intermediate Mathematics Concept Cards

200 Cards (4" x 9¾")

**359831**

For teaching and reviewing—includes arithmetic and algebraic terminology, fractions, percents, metrics, measures, geometric symbols and formulas, scientific notation, and more. Cards are correlated with the work-text.

### Intermediate Mathematics Digital Teaching Slides

**401846**

Downloadable slide decks correlate to the Intermediate Mathematics Teacher Editions Vol. 1–2. 170 lessons. Over 1,882 slides incorporate 66 instructional videos, 6 interactive web pages, and more than 600 images from the textbook.

### Pre-Algebra Concept Cards

200 cards (4" x 9¾")

**359858**

For teaching and reviewing—includes arithmetic and algebraic terminology, fractions, percents, measures, geometric symbols and formulas, scientific notation, trigonometry, and sequences. Cards are correlated with the work-text.

### Pre-Algebra Digital Teaching Slides

**386693**

205 Lesson files (cover all 170 lessons plus 35 optional lessons) of downloadable slide decks correlate to the Pre-Algebra Teacher Editions Vol. 1–2. 1,879 editable slides incorporate 93 instructional videos, 5 interactive web pages, and more than 300 images from the textbook.

## LOOK INSIDE

### Critical Thinking

Students are given opportunities to solve word problems by using an applicable problem-solving strategy. Each word problem is unique and models mathematics in the real world.

#### Finding the Slope of a Line

The slope of a line is found by comparing any two points on the line. The vertical movement between the points (up or down) is a change in  $y$ -values called the *rise*. The horizontal movement between the points (left or right) is a change in  $x$ -values called the *run*. Slope ( $m$ ) is the ratio of the rise to the run:  $m = \frac{\text{rise}}{\text{run}}$ .

The slope of the line on the right can be found using the points  $(2, -1)$  and  $(4, 3)$ . Moving from the point  $(2, -1)$  to  $(4, 3)$  requires going up 4 units and right 2 units. Therefore, the slope is  $m = \frac{\text{rise}}{\text{run}} = \frac{4}{2} = 2$  or just 2. Using the symbol  $\Delta$  to represent "change" and subscripts to represent individual points, the equation for slope can be written as  $m = \frac{\Delta y}{\Delta x} = \frac{y_2 - y_1}{x_2 - x_1}$ . The expression  $y_2 - y_1$  is read as "y-two minus y-one" and means to subtract the first  $y$ -value from the second. This equation allows the slope of a line to be determined from ordered pairs without having to look at the graph. For the points  $(2, -1)$  and  $(4, 3)$ , the slope is  $m = \frac{3 - (-1)}{4 - 2} = \frac{4}{2} = 2$ .

#### Slope Subscripts

If the equation were written as  $\frac{y_1 - y_2}{x_1 - x_2}$ , would it produce the same slope? Why or why not? How about  $\frac{y_2 - y_1}{x_1 - x_2}$ ?

3.3 Slope of a Line

#### Find the slope of each line passing through the given points.

11.  $(3, 2)$  and  $(1, -1)$       12.  $(-3, -5)$  and  $(-2, 2)$   
 13.  $(-9, 6)$  and  $(-5, 3)$       14.  $(4, -6)$  and  $(-2, 5)$

#### Graph a line through the origin $(0, 0)$ with the given slope.

15.  $m = 2$       16.  $m = \frac{2}{3}$       17.  $m = -2$

#### Graph a line through the given point with the given slope.

18.  $(4, 3)$  and  $m = -\frac{4}{3}$       19.  $(-1, -3)$  and  $m = \frac{1}{3}$       20.  $(5, -3)$  and undefined slope

#### Zero & Undefined Slope

Using two points from each line, explain why the slope of a horizontal line is zero and the slope of a vertical line is undefined.

#### Review

##### Follow the directions.

21. Explain why (a)  $2x + 8y = 16$  and (b)  $-x + y = 12$  are not in standard form.  
 22. Graph (a)  $5x + y = 10$  and (b)  $-3x + 4y = 9$  by finding intercepts.  
 23. Write and solve an equation to find what numbers are a distance of 6 from the number  $-1$ .  
 24. Mr. McNeese invested \$5,250 in two investments. He gained 7% on the first but lost 3% on the second. If he earned a total of \$250, write and solve an equation to find the amount of each investment.

### Biblical Integration

**Thought Provoker**  
 How could such an educated and technologically advanced nation be capable of committing atrocities as the Nazis did? Answers will vary.  
 • The Germans had been regarded as the most highly educated nation for most of the 19th century and into the 20th century.  
 • Advanced education does not necessarily equate to more morality, especially when the education is steeped in wrong philosophies.  
 • Increased knowledge that is absent of morality and apart from God leads to greater destructions, such as the Holocaust (Est. 2.8, Rom. 1.20-23).  
 • The Germans possessed a solid knowledge of the Scriptures through the tradition of the Reformation; however, their reliance on secular science resulted in their rejection of the Bible for evolution.  
 • Although evolution was wrongly considered to be more intellectual than Creation and Christianity, its faulty presuppositions and rejection of man created in God's image led to atrocities such as the Holocaust, where certain groups took control of the "survival of the fittest" by eliminating the "unfit" groups in the struggle for survival.  
 • Because everyone is born with a sin nature, no person is too good or too smart to commit any atrocity. Unbridled sin leads an individual down a long path that he did not originally set out to walk upon. Just as any nation that rejects God is destined to follow the destructive path of sin, any individual, including a believer, who is disobedient to God's direction in his life will also follow the same destructive path. (Rom. 2:23, 8:1-12; James 1:13-14)

### Lesson enhancement options

**Balanced History**  
 While Germany and Japan are remembered for their war crimes, it is equally important to remember that both the Allies and the Central Powers committed atrocities during the war. Neither side was perfect. Many times, the winning side's crimes are often overlooked, but it is important to balance the facts of what occurred during World War II.

to war factories or concentration camps. Some of the largest concentration camps were at **Berlin, Treblinka, and Auschwitz**. By this time, Nazi Germany also had an efficient bureaucracy to direct this genocide systematically, murder of an entire group. Several prominent leaders in this bureaucracy would go down in history along with Hitler as human monsters. **Herbert Goering** (1893-1946), Hitler's Reich Minister of War, **Heinrich Himmler** (1900-1946), leader of the SS (a large, elite group of soldiers tasked with guarding Hitler, overseeing concentration camps, and the mass killing of civilians), **Adolf Eichmann** (1901-1962), director of the SS office for Jewish deportations, and **Heinrich Himmler** (1900-1946), commander of Auschwitz concentration camp.

After arriving at a camp, the terrified and exhausted prisoners would be taken from their railroad cars and divided into two groups: a healthy group to be sent to the factories or camps and a sickly group to be sent to gas chambers or laboratories. The division was usually made by the chief camp physician. The exhausted gas chambers were designed so that the people were told to undress and were then packed into the chamber. The chamber was filled with poison gas. The corpses were then pulled out and stacked before mass cremations to be burned. Other Nazi war criminals were sent to laboratories for medical experiments made by Nazi physicians.

All these camps were run by other groups of people, including Germans, Poles, Russians, Czechs, intellectuals, homosexuals, Communists, and Christians were systematically slaughtered by the Nazis during World War II. This horrible massacre is remembered today in the **Holocaust**.

**The War Crime Trials**  
 Nuremberg. From 1945 to 1946, many of the Nazi leaders were put on trial in **Nuremberg, Germany**. At the first session of the trial, many Nazis were convicted, but relatively few were executed or imprisoned. Perhaps the most shocking fact that emerged from the trial was that many German people—most just a few hundred Nazi leaders—had witnessed much of the brutality and aggression and had given their tacit approval. This fact demonstrates the spiritual and moral bankruptcy of a nation that accepts the teachings of Darwinism, humanism, and socialism.

**Warime Conferences**  
 Tokyo Conference. During the war, the Allies had held several conferences in which they only planned future strategies to defeat the Axis but also considered what would be done after the final victory. Between November 28 and December 1, 1943, the "Big Three" (Churchill, Roosevelt, and Stalin) met at **Yalta, Russia**. The most important discussion at this meeting centered on the fate of liberated countries and a potential international peace-keeping organization after the war. The conference at Yalta was strained because

**25.4b Review**  
 • What were pilots of suicide planes loaded with explosives? Kamikaze.  
 • Who succeeded Franklin D. Roosevelt as president? Harry S. Truman.  
 • Name the declaration which called upon the Japanese to surrender unconditionally and to withdraw to the home islands. Potsdam Declaration.  
 • Name the three talented nuclear physicists who worked on constructing the atomic bomb. Enrico Fermi, Edward Teller, J. Robert Oppenheimer.  
 • Who signed a letter to Roosevelt in 1939, warning him that the Germans might produce an atomic weapon and that the United States should begin research in this area? Albert Einstein.  
 • Name the two Japanese cities where the United States dropped the atomic bombs. Hiroshima, Nagasaki.  
 • Name the Japanese emperor who told his people by radio that they had lost the war. Hirohito.  
 • Name the full date for V-J Day. September 2, 1945.

Recommended for  
Grades 7-12

**Through Flood and Flame***by Henry Charles Moore***82368**

Mankind will never know how many brave men and women endured persecution for their faith during the stormy days of the Reformation. This collection of short biographies recalls the adventures and sufferings of several little-known Protestant heroes who dared to stand for the truth against the tyranny of the Inquisition.

Recommended for  
Grades 7-12

**Alexander Mackay:  
God's Engineer***by Sophia L. Fahs***82686**

"My heart burns for the deliverance of Africa!" Stirred by the legacy of missionary David Livingstone, young Alexander Mackay determined in 1875 to carry the gospel to the land of Uganda on the shores of Lake Victoria. The Scottish engineer soon discovered a ministry among the African people that would earn him the title, "Uganda's White Man of Work."

Recommended for  
Grades 7-12

**Adoniram Judson:  
God's Pioneer***by J. Mervin Hull***82678**

Never mind that America had no foreign missionary societies—he would help start one. Let the British kick him out of India—he would take his good news to Burma. Tear him from wife and child, lock him up in a filthy prison, beat him, starve him—nothing could deter Adoniram Judson from his mission. He would blaze a trail for the gospel through the pagan wilderness, or die trying. Here is the spirit of a true pioneer!

Mr. Pyle earned a bachelor's degree in Music Education from Tennessee Temple University and a master's degree in Educational Administration from Pensacola Christian College.

He has been involved in Christian education for over 50 years as a teacher, Christian school administrator, and as the Sales Manager for Abeka Book, Inc. Mr. Pyle retired from Abeka in July of 2023 but has returned in a part-time capacity to help serve the schools of Brasil.

At the first Christian school where Mr. Pyle was in charge of making curriculum decisions, he chose Abeka and from then on, his schools used the Abeka curriculum exclusively. He likes to tell people that he was sold on Abeka before they paid him to sell the curriculum.

**Put Mr. Pyle's experience to work for your school
