# Laying the Foundation for Success

## BIBLICAL WORLDVIEW

**Integrates into each subject**

**Emphasizes God's character and eternal truths**

**Equips learners of all ages to stand firm in God's Word**

**Prepares students to make a difference for eternity**

Teaching every subject through the lens of Scripture reinforces that our lives aren't split into the sacred and the secular everyday life. It gives students countless opportunities to come to Christ for salvation and to adopt biblical values of their own.

## PROVEN PHILOSOPHY

**Leads and engages learners**

**Builds character**

**Includes cross-subject integration, phonics-based reading, and a spiral learning approach**

Materials and methods start with the firmest foundation: what the Bible says about human nature, knowledge, authority, orderliness, and philosophy. Instead of complying with the latest short-lived academic trends, lessons are built on methods that have produced results for generations.

Your student will learn the knowledge and skills he needs, but he'll also learn how to learn, build sound character, establish healthy relationships with others, and form the priceless habit of personal accountability.

## RESEARCH & DEVELOPMENT

**Utilizes curriculum mapping**

**Incorporates educational standards and objectives**

**Studies academic trends**

**Evaluates how Abeka prepares students for standardized testing**

**Applies customer feedback**

Products meet both biblical standards and academic standards so that your student is prepared for wherever God calls him—from the mission field to the medical field. Abeka provides relevant, data-driven resources created to meet your needs. You won't be teaching to a state or national test, but your student will be ready. When you use Abeka, you'll experience how a Christian education is an excellent education.

## CRITICAL THINKING

**Enabled by learning a firm foundation of facts**

**Challenged through higher-level thinking and application of facts**

**Supports the goal of well-educated students able to defend their faith and apply knowledge**

Building from a foundation of facts, your student will learn how to apply those facts to solve problems, generate ideas, and discern truth. He'll be able to think through issues, form logical arguments rather than just opinions, and make wise decisions. He'll be equipped to stand out as a leader and use his influence to make a difference.

World Geography guides students through the regions of the world, combining the study of physical and cultural geography from a biblical worldview. Using maps, photos, charts, graphs, and illustrations, students can visually interact with the content. New features—such as thought-provoking questions, cultural highlights, and case studies—will encourage students to build and apply their critical thinking skills. In addition, the Map Studies workbook offers opportunities for students to practice their map skills and to work through exercises, sharpening their analysis and critical thinking skills. This course allows students to apply their knowledge of geography and to see how geography influences their lives.

## Electives

### Personal Financial Literacy

Grounded in a biblical worldview of stewardship, *Personal Financial Literacy* engages students in sound financial practices and extends into 21st century financial technology. This text includes practical activities such as creating a high-school budget, choosing an occupation, exploring college or skilled job training, opening

and managing bank accounts, practicing a zero-based budget, purchasing a vehicle, renting an apartment, building an excellent financial reputation, paying off debt, choosing the correct insurance, and choosing a diversified investment portfolio. While learning about income, spending, saving, credit and debt, insurance, and investments, students will be challenged to develop personal, biblical convictions about stewardship. The balanced, biblical perspective combined with the practical preparation for managing personal finances provides a valuable resource for young adults.

## A DAY IN THE LIFE

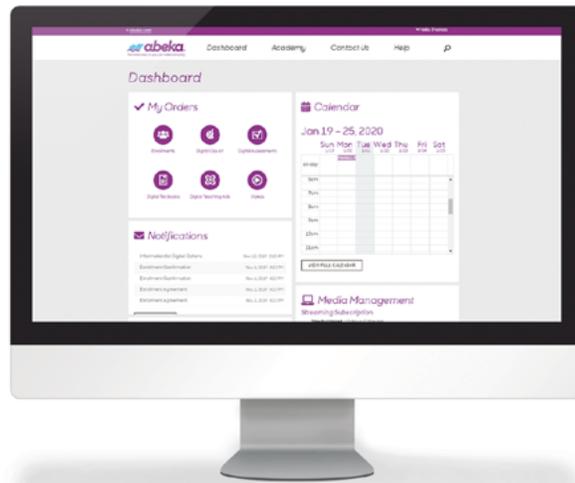

When you choose to give your child a home education with Abeka Academy, you're getting the flexibility of homeschool and the traditional setting of a Christian school classroom. The classroom setting will give your child the competition she needs and truly make her feel as if she is part of the class.

Each day, your child will spend about 4-6 hours completing her lessons for the day, primarily through engaging video instruction. While the lesson planning and teaching are done for you, your child will still have the benefit of your one-on-one guidance at home as you set up her video lessons, help keep her on track, oversee her daily assignments, administer her assessments, and grade her work.

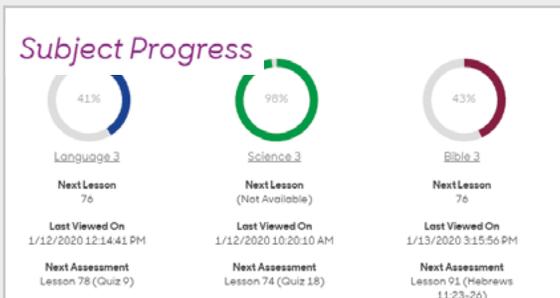

The best part of homeschooling is getting to school your way and on your schedule. We give your child a full 12 months to finish her lessons, but the when and where are entirely up to you because we know that you are best equipped to arrange your child's daily schedule.

Our creative and experienced video teachers provide daily lessons in engaging and unique ways that aid in retention. Each day, your child will listen to the lesson instruction, participate in the interactive video portions, complete daily assignments and activities, and test her knowledge and comprehension by taking the called-for assessments.

*If your child has questions on the homework or over the lesson, our experienced Academic Advisors are available for tutoring. If additional assistance is needed, just call 877-223-5226 to reach them.*

## DO WHAT WORKS (PHONICS-BASED READING)

Teaching your child to read shouldn't be a struggle. Enjoy inspiring your five-year-old to read using the simple steps of Phonics. Sounding one- and two-vowel words will delight your child as he is able to read simple stories on his own!

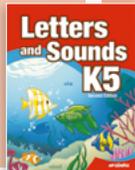

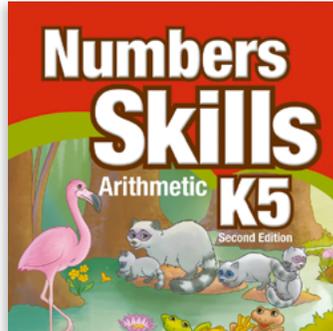

# At-a-Glance

Sound blends, one- and two-vowel words, and words with phonics special sounds

Recognize, count, and write numbers and number concepts from 1 to 100

Memorize addition facts up through the number 10

Write letters, blends, words, sentences, and his own name in cursive

Memorize over a dozen poems

Identify what numbers come before and after any number from 1 to 100

Understand the largest and smallest from numbers 1 to 100

Complete one-step story problems (addition)

Begin to learn about subtraction

Explore plants, animals, Earth, space, and health

Learn about community helpers like the firefighter and police officer

Map famous places in the United States

Read sentences and stories from over a dozen different books

Hear about the Life of Christ

Engage in art activities

Learn about children of other countries

First graders are concrete thinkers who thrive on structure, repetition, and visual learning. Your first grader may ask lots of “how” and “why” questions as she explores the world around her. Abeka’s curriculum offers a flexibly structured program that nurtures curiosity while building critical

thinking skills and godly character. This year, your child will gain confidence in recognizing and using all phonics sounds, complete three-digit addition and two-digit subtraction problems, use correct punctuation, and grow in understanding of health, safety, and manners at home and in public.

## LAYING THE FOUNDATION FOR SUCCESS

# ENCOURAGE THOUGHT

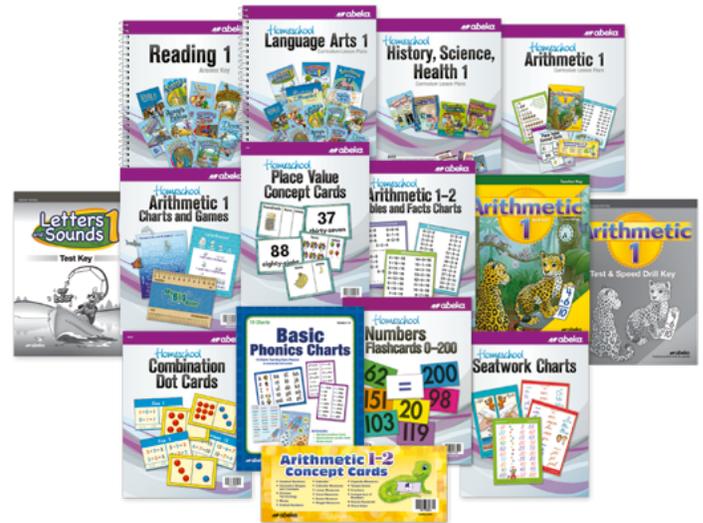

"Learning to read" prepares students for "reading to learn," building a natural bridge to critical thinking. Through text questions and guided discussion, children learn to organize and analyze information and answer inferential questions based on textual clues as they develop an awareness of the world around them.

# Full-Grade Book Kits

Save time—and 10%—by ordering full-grade kits instead of several individual items. Your child will get the benefit of seeing related content in several subjects. And you'll have the peace of mind that comes from knowing you won't have to worry about learning gaps. Plus, you won't have to try to figure out how to use several different curriculums at once.

The aim is to help them really understand basic principles of science. The text presents the world as the creation of God and glorifies Him as its Sustainer and Upholder. It introduces great scientists and naturalists who believed in the biblical account of Creation, and where appropriate it refutes the materialist's faith in evolution. Students learn about plants, animals, matter, energy, light, minerals, and other topics. Review questions and a multitude of activities and demonstrations make this a thoroughly teachable text.

As the elementary years draw to a close, sixth grade is the springboard for middle school and beyond. What makes it a special time is your child's increased capacity for abstract thinking and deductive reasoning. By the end of the year with Abeka, your sixth grader will be able

to grasp percentages; develop problem-solving strategies; learn basic concepts in chemistry; increase her knowledge of the plant and animal world; and express herself in writing through poetry, journaling, book reports, and a research paper.

*With elementary school behind you and the prospect of growing up before you, the next few years will fly by. Abeka is here to help you make the most of this time.*

## **Decisions, Decisions, Decisions**

Over the next several years, you and your student will face more and more decisions. Some will be about his long-term future. But not every choice concerns college and career paths. In high school, you'll have to decide about electives.

There's also the issue of how you'll document your student's educational accomplishments. Be sure to do your research, as the requirements vary from state to state. These are just the start of your decisions.

## **What We've Learned About How Teens Learn**

Any family with a teenager can experience conflict. Ironically, such difficulties occur as our children become more like us. Abeka understands which academic disciplines are foundational to their future. So as they move toward independence, our coursework provides them with opportunities to demonstrate their ability to set goals, plan their time, and succeed more independently.

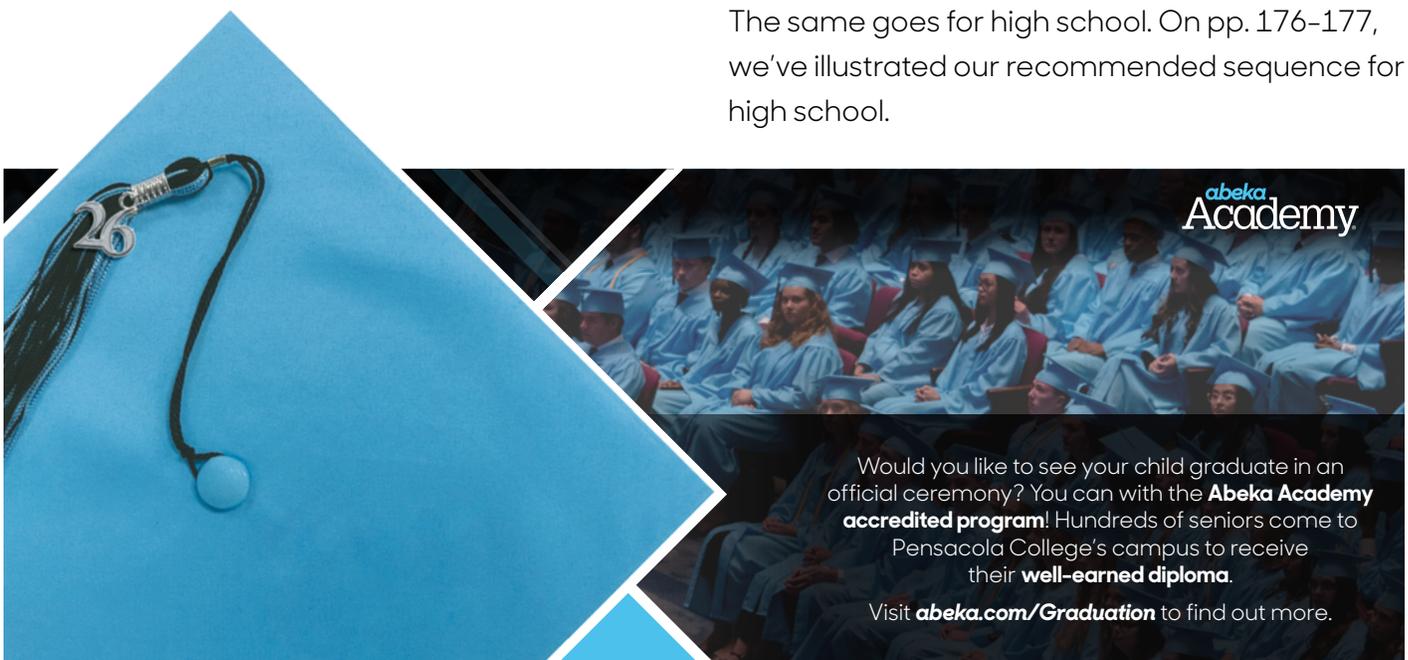

## **Doing What's Best For Your Student**

We partner with parents as they educate their children. That's why we designed a recommended sequence of study to help students learn better. Based on over 50 years of real-life experience, our unique approach reinforces learning by coordinating content across subjects. For example, the literature focus for a tenth grader complements the focus of his history and geography studies. Best of all, we make it easy to order by bundling items together in kits.

However, we respect a parent's desire to have the final say in their student's education. So while we can only guarantee maximum effectiveness when you follow our recommended sequence, we want you to do what's right for your family. That's why we've included some helpful tools in this catalog.

On the next page, you'll see the courses your middle schooler should take and which year. But you'll also have the option of deciding on a different sequence for many of those classes.

The same goes for high school. On pp. 176–177, we've illustrated our recommended sequence for high school.

Would you like to see your child graduate in an official ceremony? You can with the **Abeka Academy accredited program!** Hundreds of seniors come to Pensacola College's campus to receive their **well-earned diploma.**

Visit [abeka.com/Graduation](http://abeka.com/Graduation) to find out more.

With elementary school finished, you can ensure your child gets a strong start to his secondary education. Middle schoolers are pulled in different directions—academically, emotionally, and socially. They’re beginning to form their own opinions while navigating new

responsibilities. With your influence supported by Abeka’s structure and biblical foundation in their schoolwork, your middle schooler can thrive. This year he’ll be diving into Literature, Grammar and Composition, World History, and Life Science—all from a Christian perspective.

Eighth grade marks a turning point. Your child is thinking more deeply and growing more independent. It's a pivotal year filled with personal growth and academic challenges. During this time, you'll witness the development of your eighth grader's abstract reasoning skills. Don't be surprised if she begins to question things; this is

a normal part of intellectual growth that allows you to demonstrate the solid reasoning behind your family's beliefs. This year, your child will build on what she learned in seventh grade with Literature, Grammar, Composition, Pre-Algebra, U.S. History, Earth and Space Science, and a study of wisdom through Proverbs.

This course begins with an in-depth look at the personification of Wisdom to learn about her character and instruction, leading us to a life characterized by wise choices. Well-known Bible examples such as Abraham, Ruth, Daniel, and the Proverbs 31 woman will show us why wise living is worth pursuing. This course also applies the "whatsoever things" principles from Philippians 4:8 to provide a topical study of the wisdom in Proverbs that informs our worldview. The study is enhanced with Grow in Wisdom prompts to encourage personal application of Scripture and Dig Deeper sections to provide further study of related topics.

## LAYING THE FOUNDATION FOR SUCCESS

# ENCOURAGE THOUGHT

The purpose of science is carefully observing nature, discovering the laws of creation, and using those laws for mankind's benefit. Understanding that the world is the orderly creation of a wise God, students are equipped to use the scientific method to articulate problems, design experiments, and find solutions.

**Section Review 1.2**

**CONCEPT REVIEW**

1. What is an experiment?
2. What is a hypothetical question?
3. What form of deductive inference is used in the following argument?  
If Roger can play the piano, then she is a musician.  
Roger can play the piano.  
Therefore, Roger is a musician.
4. Explain the difference between deductive reasoning and inductive reasoning.
5. What are some methods of inductive reasoning?
6. What is a fallacy?

**APPLY SCIENCE**

1. Consider the experiment described in Section Review 1.1. Analyze it. What method of inductive reasoning does this experiment use? How do you know?
2. List 100 other methods that then follow always. Write them down! Do you really know the conclusion that is correct? Have you been able to make a prediction? How can you explain how you know?

**1.3 Engineering Design**

As we have already seen, there are two main reasons for studying science: to bring God's glory and to use scientific knowledge for mankind's benefit. This text and course leads to the field of technology, which is the use of science to solve practical problems. The development of technology is engineering.

**Defining the Technology**

Just as scientists use the scientific method to investigate the laws of nature, engineers use the engineering design process to develop technology. Even if you do not become a professional engineer, you can use the engineering design process to find new and better ways to do things.

The engineering design process can be described by four main components: defining the problem, designing a solution, and evaluating the solution. Fig. 1.16 Although the details of the process will vary, these three steps are used by developing things as diverse as pencils, light bulbs, factories, and computer programs.

**Fig. 1.16 Defining the problem**

**Defining the problem**  
The engineer must first define the problem and determine what the customer wants.

**Designing a solution**  
The engineer must then design a solution that meets the customer's needs and constraints.

**Evaluating the solution**  
The engineer must then evaluate the solution to see if it meets the customer's needs and constraints.

**1.1 Engineering Design**

After the engineer has a list of design ideas, he will make a detailed plan of the design. For a physical object, this will be a detailed drawing or series of scale drawings including measurements and materials of all the components. For a software program or a computer program, the plan could be a detailed list of the steps to be performed.

**Evaluating the solution**  
To evaluate the solution, the engineer will construct a prototype, a model of the design for some part of the design that is used for testing. For a computer design like an automobile, several different prototypes may be built, each used to test a different aspect of the design, since these tests are completed at a different stage of the entire design will be built. Each prototype will be put through a series of tests to ensure that the design solves the problem and meets all of the criteria and constraints.

It may be found that the design fails to meet the criteria and constraints. In this case, the engineer will have to evaluate the design and determine why it failed. In some cases, it will be possible to use the design to make additional tests. In other cases, it will be necessary to refine the design or even start over with a different design idea. The prototype will then be adjusted or a new prototype built to test the changed design.

The cycle of testing, refining, and retesting the design continues until the design satisfies the criteria and constraints. At this point, the design is considered complete. Of course, there may be other ways the design can be improved, but making those improvements starts the engineering design process again, with a new problem, criteria, and constraints.

**Applying the Process**

As an example of how the engineering design process works, suppose Emma needs to make a wheelchair for several weeks while recovering from surgery. Emma wants to figure out a way to help her manage for the second floor of her house on her own. Emma realizes that being able to get her room upstairs is her greatest concern. After considering the problem, she lists the following criteria and constraints:

- Criteria
  - The solution must be able to move someone up and down a flight of stairs.
  - The solution must allow an individual to use it without assistance.
  - The solution must take no more than six months to use.
- Constraints
  - The solution must be safe.
  - The solution must be inexpensive.
  - The solution must not block the staircase when not in use.

Now that Emma has defined her problem for choosing criteria and constraints, she researches to find out how others have solved similar problems.

## LAYING THE FOUNDATION FOR SUCCESS

# ENCOURAGE THOUGHT

As learning goes beyond facts to the application of those facts, literature study provides a unique opportunity to develop your student's ability to evaluate based on biblical worldview principles.

### Forming a Response

**DISCUSSION PROMPTS**

1. Why is self-sacrifice so important in the Christian life? What are some of its benefits to the Christian?
2. What literary device is used in line 13? Explain.
3. What does the metaphor of the scar refer to? What kind of metaphor is it?

**WRITE ABOUT IT**

Read one of the passages of Scripture referenced in the Biblical Worldview above or a similar passage. Write a devotional poem reflecting the truths found in the passage and how they affect you personally.

arrive, it can be tempting for your teen to ease up. Encourage her to stay motivated. This year, she'll complete her high school journey with courses like English Literature, American Government, and Personal Financial Literacy, prepared for whatever God has next.

## LAYING THE FOUNDATION FOR SUCCESS

# BUILD ON THE BIBLE

Genesis is a practical course that equips your student with tools to know, apply, and share his beliefs based on God's Word through topics of origins, worldview, and apologetics.

of false beliefs with commandments among them.

While God has clearly revealed truth in His Word, He gives man the free will choice to accept it or deny it.

**+** **My Worldview**

Studying the infallible Word of God given through divine revelation by the infallible Creator leads us to a decision point. Do we believe what the Bible says as truth? For many today, truth is subjective, based on personal perspective. Fallacies and false beliefs are the result of man's compromise or rejection of the truth. If we believe as John 17:17 says, "thy word is truth," we find that science and Scripture are in harmony because both were gifted to us by our marvelous Creator. How am I and how are those around me responding to truth?

Genesis 1:1 sets the stage for the omnipotent and all-wise Creator to execute His plan for bringing mankind into existence and providing a beautiful world for him to inhabit and to subdue. Throughout the rest of Genesis and the rest of the Bible, God's power, holiness, and mercy are witnessed again and again as He offers those created in His own image the privilege of knowing Him and loving Him, as He first loved us (1 John 4:19).

What biblical truth have you gleaned?  
**Sample:** God's Word is truth regardless of man's compromise or rejection of it.

How does this truth affect you?  
 Include at least one verse that will support or help you apply this truth.  
**Sample:** I have the free will choice to believe the truth of the Bible regarding Creation or reject it. I must recognize that many around me have rejected the Bible as truth and, as a result, have rejected Creation (2 Tim. 4:3-4). I need to be prepared to articulate what I believe in order to share truth with others (1 Pet. 3:15).

## How Abeka Began

In 1954, Dr. Arlin and Beka Horton launched Pensacola Christian Academy in Pensacola, Florida, with the goal of giving children an excellent education with a Christian foundation. As a result of their success, Christian schools around the country began asking for help. Those schools needed textbooks, curriculum, and other resources to teach the children in their schools. That's when Abeka was born.

Soon Abeka expanded to publish materials for homeschooling parents wanting to give their children the best education possible.

Children using Abeka receive an exceptional education—one based on the truth of the Bible instead of humanistic philosophies. Our skilled researchers and writers don't merely paraphrase progressive education textbooks and then add biblical principles; they do primary research in every subject, looking at the subject with a biblical worldview.
